

Kinship Place a place to help things happen

kin-ship (noun) A feeling of being connected to other people

Synonyms and related words: affinity, affiliation, alliance, association, connection, liaison, linkage, relation, community, congruity

Kinship Place was conceived as a versatile gathering space, with features that will facilitate ... whatever it is you do. Whether it's bringing people together for a training, for an off-work site strategic meeting, a reunion of old friends and family, or a quiet rural retreat for writing, yoga, quilting, you name it, this lovely space and its stunning natural setting in the Driftless region of southwest Wisconsin seems to bring out the best in us. By helping us relax and be in touch with the natural world, Kinship Place can help your group feel connected, be collaborative, and have fun.

"We had a fabulous experience running our course at NNR last summer and every single one of our participants was thrilled with the amenities and accommodations." Peter and Mo, Savannah Gardens

"Our Senior Management team spent several days at Kinship Place absorbed in a high level planning project. The beauty and isolation provided by this amazing facility made the difficult work we faced a far more pleasant and productive experience. Easily accessible and well sorted in a distraction-free environment, we were able to focus on the task at hand while enjoying a beautiful view and comfortable amenities." Claire, S&S Cycle
